

TurboTorch®

Professional

Portable Performance

Versatility. Along with superior performance and quality, **versatility** has always been a characteristic of every torch kit designed and manufactured by TurboTorch. Our new STK-31 ProPak torch kit for MAPP and Propane is the latest example of how TurboTorch makes it easy for pros to buy one torch kit and realize an expanded range of flexibility.

The TX500 ProPak is a unique combination of the hottest self lighting torch the TX-504, plus a cooler tip the T-503, which is ideal for general plumbing jobs. The STK-31 kit combines the most popular hand torch, the STK-9, with a handy second tip, the ST-1. For the most common jobs the STK-31 using the ST-3 tip is the ideal torch. However for smaller jobs the installer can quickly and easily change to the ST-1 tip for fast soldering or brazing tasks. All TurboTorch hand torches feature 360° swivel and easy-to-clean orifice screws.

Both the TX-500 and the STK-31 feature Extreme Swirl Technology torches and the versatility to handle different jobs quickly and easily. Only TurboTorch offers these unique kits **with an extra tip!**
