## HIGH EFFICIENCY COMMERCIAL CONDENSING BOILERS

## SMART SYSTEM

OPERATING CONTROL FEATURING A BUILT-IN CASCADING SEQUENCER

5 MODELS: 399,000 - 800,000 BTU/HR

FIRING RATE MODULATION TO 5:1

LESS THAN 20 ppm NOx

DIRECT VENT FLEXIBILITY TO 100 FEET

# THE SMARTEST CHOICE FOR CONDENSING BOILER PERFORMANCE

The KNIGHT® XL, engineered with Lochinvar's exclusive SMART SYSTEM™ control and an array of other innovative features, places it far ahead of any commercial heating boiler in its class. It promises and delivers ultimate ease of installation and maintenance. With up to 94.6% thermal efficiency, low-NOx emissions and a fully modulating burner, it is the best "green choice" for today's environmentally focused market.

Five modulating/condensing stainless steel KNIGHT XL boilers are available with 399,000–800,000 Btu/hr inputs and remarkably small space-saving footprints. All are equipped for direct-vent installation with air intake and exhaust runs up to 100 feet using PVC, CPVC or AL29-4C vent materials. This range of choices is ideal for light-duty applications such as small hotels, schools and office buildings. For higher-demand applications, up to eight KNIGHT XL units can be installed utilizing the built-in cascading sequencer to deliver up to 6.4 million Btu/hr heating capacity.

THE KNIGHT XL BOILER reflects Lochinvar's constant commitment to providing all the options you need to serve every application.

KNIGHT XLs installed and commissioned by Black & M<sup>c</sup>Donald

### **ADVANCED NEGATIVE REGULATION TECHNOLOGY**

KNIGHT XL safely and reliably operates with supply gas pressure as low as 4 inches water column.

Negative Regulation (Neg/Reg) technology automatically adjusts fan speed that ensures the correct volume and mix of fuel and air throughout the firing range.

### Two-in-One Stainless Steel Heat Exchanger

A primary heat exchanger combined with a secondary heat exchanger captures flue gas heat and condenses to utilize available latent energy. The stainless steel, pH-tolerant design features a weld-sealed assembly with no O-rings or gaskets and does not require special glycol. ASME Section IV approved and stamped.

## **FULLY MODULATING BURNER**

The SMART SYSTEM allows fully modulating combustion with 5:1 turndown. The burner can fire as low as 20% of maximum input and modulates the firing rate up to 100% as demand increases. The burner is a single stainless steel assembly covered with woven steel mesh and fires in a 360° pattern along the entire length of the primary heat exchanger. This allows the compact KNIGHT XL to exceed the capacity of units with larger multiple burners.

## **DIRECT VENTING UP TO 100 FEET**

iss

KNIGHT XL offers 7 venting options and tremendous flexibility for placement of units within the building, because it permits direct-vent air intake and exhaust runs up to 100 equivalent feet using either PVC, CPVC or AL29-4C stainless steel vent pipe. A sidewall vent termination kit is shipped standard with every KNIGHT boiler.

SIDEWALL VENT TERMINATION

# REFINED DESIGN PUTS MORE CONTROL AND INFORMATION AT YOUR FINGERTIPS

#### Advanced features include:

- Multi-Color Graphic LCD Display
- NAVIGATION DIAL
- USB Port
- ABILITY TO CONTROL UP TO THREE DIFFERENT SETPOINT TEMPERATURES
- MODBUS CAPABILITY (OPTIONAL)
- DHW Modulation Limiting
- DHW Night Setback\*
- 0-10 V BOILER RATE OUTPUT
- 0-10V SIGNAL TO CONTROL VARIABLE SPEED BOILER PUMP\*
- 0-10V SYSTEM PUMP SIGNAL INPUT\*
- HEAT DEMAND FROM 0-10V INPUT
- INSTALLER TO PROGRAM NAME AND NUMBER INTO THE BOILER
- Freeze Protection Parameters Installer Adjustable
- SEPARATELY ADJUSTABLE SH/DHW SWITCHING TIMES\*
- Installer access to BMS and ramp delay settings

\*EXCLUSIVE TO LOCHINVAR SMART SYSTEM

**BLUE SCREEN** 

Normal system operation.

#### YELLOW SCREEN

Maintenance due - shows the installer's name and number on the display.

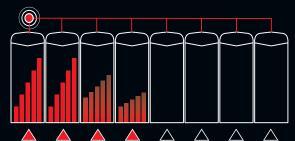

#### **RED SCREEN**

Lockout mode.

## **NEW SELECTABLE CASCADE OPTIONS**

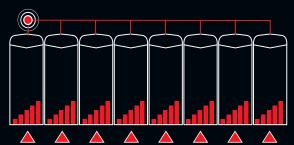

When multiple KNIGHT boilers are installed together, the SMART SYSTEM built-in sequencer can be set for "Lead-Lag" cascade or "Efficiency Optimized" cascade operation.

## **LEAD-LAG CASCADE**

The "lead unit" boiler modulates with demand to capacity. As demand increases, additional boilers fire and modulate to capacity. This continues, with additional boilers firing and modulating to capacity until all units are operating. Every 24 hours, the SMART SYSTEM automatically shifts the lead boiler role to the next in the sequence, distributing lead-lag runtimes equally.

## **EFFICIENCY OPTIMIZED CASCADE**

This feature optimizes the modulation capabilities of the Boiler Plant while evenly distributing run time across all cascaded boilers. Every 24 hours the SMART SYSTEM automatically shifts the 1st boiler on role to the next in the sequence, distributing run time equally.

SMART SYSTEM Cascade option allows 2 - 8 boilers to be sequenced.
