

INSTALLATION INSTRUCTIONS

Series 601-M Metal Air Gap Drain Kits

Sizes: ½" - 2" (15 – 50mm)

Installation Instructions

Kit Numbers 905532 and 905533, Metal Air Gap Drain.
For FEBCO RP, Series 860.

1. Before installation check local codes. This type of air gap drain may not be approved for use in some areas.
2. If installed indoors, the assembly should be installed near a floor drain sized to adequately handle discharge.

Note: The gap drain is not designed to catch the maximum discharge possible from the relief valve. The installation of FEBCO air gap with the drain line terminating above a floor drain will handle any normal discharge or nuisance spitting through the relief valve. However, floor drain size may need to be designed to prevent water damage caused by a catastrophic failure condition. Do not reduce the size of the drain line from the air gap fitting.

3. After installation of backflow assembly and piping, attach drain funnel to relief as shown, using self tapping screws provided in kit to join drain funnel halves together, making sure that the slots in the drain funnel are located over tabs on relief valve port.

Drain funnel was not designed to, nor is it able to support drainpipe weight.
