

Venstar Extra-Zone ACC0450

STANDARD FEATURES:

- Designed to work with ZoneFirst RDM dampers
- Quick and easy to install
- Controls up to four dampers for simultaneous operation
- Includes digital duct temperature sensor
- Stops over heating in upstairs rooms
- Corrects over or under conditioning in areas
- Use in areas that only need conditioning occasionally
- Can be configured for ventilation or energy savings mode
- Saves energy by allowing conditioning only when required
- Designed to work with field supplied 24-volt transformer (300MA minimum)
- Designed to work with Venstar wired or wireless thermostats (not included)
- * Add-A-Zone controls a damper only and does not bring on HVAC equipment
