The new proPANEL line makes radiant floor heating simple and profitable.

- More options for less money than previous models
- Eliminates multiple controls
- Easy wiring configuration; no confusion
- Purge capability and pump isolation included
- Less connections means less risk of leaks
- Small, compact design
- Updated hardware and circulators
- Decreased installation time and setup costs
- Intuitive 5-button interface for easy setup and viewing
- Quick and simple connection to Multifunction Climate Cōntrol™ hydronic controller
- No assembly required
- Quick one-person installation
- Modular, for use with other proPANEL® models for additional heating needs
- Increases functionality without increasing cost

Nothing to source, assemble or balance.
Just a small cabinet, complete and ready for installation.

Introducing the new and remarkably improved Uponor proPANEL line.

Simplicity is a beautiful thing. Especially when it saves time, space and most important, money. Uponor radiant heating systems offer your customers the ultimate in comfort. And our new line of Uponor proPANEL pumping and mixing units can increase functionality without increasing cost. Four Uponor proPANEL units have been completely redesigned to meet the needs of customers and professionals alike, and add even more value to your business.

Easy to install. Easy to use.

We’ve replaced traditional thinking with something we call Uponor Logic. When we redesigned this series of proPANEL pumping and mixing units, we improved just about every pipe, pump, fitting, gauge, wire and part. This small, lightweight proPANEL is easy to install and priced right. It now has a modular design that allows you to easily combine proPANEL pumping and mixing units when additional heating is required. It has pre-labeled receptacles for connecting Cat5 cable to the Multifunction Climate Cōntrol. You’ll agree it’s an example of engineering excellence and Uponor Logic at work.

Uponor Logic. Also known as peace of mind.

Uponor Logic is a unique approach to analyzing problems and providing solutions. It’s our comprehensive analysis, stringent engineering and rigorous testing that ensures our products and systems are the best, most reliable, intuitive and intelligent available today.

- Uponor is a leading international supplier of radiant heating, plumbing and fire safety systems.
- With more than 30 years of proven performance, Uponor delivers comfort and peace of mind to millions of homeowners in 100 countries around the world.
- We believe in sustainable building and use materials, practices and packaging that are designed to minimize our impact on the environment.

For more in-depth information about all the improvements we made, call us at 800-321-4739 or visit www.uponor-usa.com (U.S.) or www.uponor.ca (Canada).
