

# How to determine the right dehumidifier size

Condition without a dehumidifier (during warm and humid outdoor conditions)	Square feet of area				Removal capacity needed in terms of pints per 24 hours
	500	1000	1500	2000	
<b>Moderately damp</b> Space feels damp and smells musty only in warm, humid weather.	<b>10 pints</b>	<b>14 pints</b>	<b>18 pints</b>	<b>22 pints</b>	
<b>Very damp</b> Space always feels damp and smells musty. Walls and floor show damp spot.	<b>12 pints</b>	<b>17 pints</b>	<b>22 pints</b>	<b>27 pints</b>	
<b>Wet</b> Feels and smells wet. Seepage occurs. Mold and mildew growing on surface.	<b>14 pints</b>	<b>20 pints</b>	<b>26 pints</b>	<b>32 pints</b>
