MADE EASY

Remote Sensor Module

The ecobee Remote Sensor Module (RSM) has been designed to allow you to have even more control over your building's operating system.

Features
- Supports 10K, NTC resistive temperature sensors and 0-10Vdc or 0-5Vdc humidity or CO2 sensors.
- Monitor remotely via an online management portal.
- Up to 4 more dry contact inputs capable of generating alerts when tripped.

Control Sensor
Take control of your system with the ability to:
- Use a sensor to control the HVAC system instead of the thermostat.
- Find optimal comfort by averaging temperature and humidity sensors in your building.
- Use existing thermostat high/low temperature alerts to notify you of any problems with the system.

Monitoring
- Monitor indoor and outdoor temperature, humidity, CO_2, discharge air temperature and even non-HVAC equipment.
- Set different thresholds or actions for each sensor.
- Set up the RSM to alert you if the sensors detect something wrong.

GREEN
MADE EASY

Remote Sensor Module

The ecobee Remote Sensor Module (RSM) has been designed with your whole home comfort in mind.

Features
- Supports the majority of off-the-shelf 10K NTC temperature sensors or humidity sensors.
- Can be monitored remotely through your online web portal from any computer.
- Up to 4 more dry contact inputs capable of generating alerts when tripped.

Control Sensor
Take control of your home comfort with the ability to:
- Use a sensor to control your comfort instead of the thermostat.
- Average temperature and humidity sensors in your home to get optimal comfort.
- Use existing thermostat high/low temperature alerts to notify you of any problems with the system.

Monitoring
Monitor the temperature and humidity of various locations in your home and be alerted if there is a problem with your system.
