

Loaded, Rugged and Compact!

NEW

The new SVG3 Micron Vacuum Gauge has the right features for HVACR pros, is easy-to-use, and built tough to handle day-to-day use in the field.

- **Rate Calculator**

View how fast system pressure is rising or falling.

- **Schrader Depressor**

Minimize hoses and potential leaks.

- **1 Micron Resolution**

- **0 - 9999 Micron Range**

- **Alarms and Stopwatch**

Be alerted when system drops to desired level, and know how long it stays there.

Tee Fitting Included

Test Tools HVACR Pros Trust

Loaded

The SVG3 contains features to make evacuations easier and faster. The display has a bright backlight for high visibility in any situation. To minimize leaks the SVG3 has a Schrader depressor that can connect directly to your core removal tool, or directly to the service port. Fewer connections reduce the potential for leaks unrelated to the system. Use the rate indicator to help determine if there are any leaks in the system.

Rugged

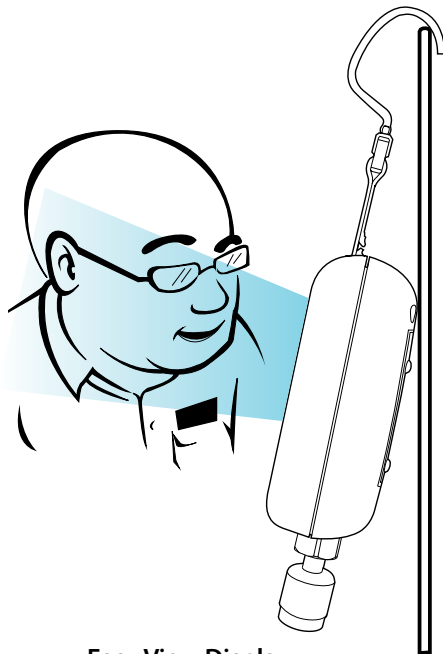

Fully rubberized case feels great and helps protect the meter if dropped. Uses industry standard user-replaceable hose gasket to ensure a tight seal everytime.

Compact

Super compact design fits comfortably in your hand or in tight spaces.

Easy View

Hands-free hook and strap design maintains upward display visibility. Hook the SVG3 anywhere and the display is easy to see.

Easy View Display
Strap and hook make the display easy to see while hanging

Use It Your Way

Recommended: Directly Onto Schrader Core Removal Tool

Cramped Areas: Use the Included Tee When Using a Single Hose in Tight Spaces

Traditional: In-line Between System and Vacuum Pump
