LED Flashlight & Mirror

Model
PLM2

The PLM2 pocket extension LED flashlight comes with a mirror attachment for inspecting nameplates, hardware, or anything else hidden around the corner or in the dark. It extends to over two and a half feet to give you easy access in close quarters.

Features

- Telescopes between 6½" and 30 ½".
- Bright white LED to light the darkest of places.
- Mirror slides off when all you need is a flashlight.
- Clips to your pocket just like a pen.
- Pivot control with adjustable tension screw.
- Omnidirectional ball joints for precise mirror positioning.
- 2" x 1" mirror size.

Operator's Guide

COMFORTABLY VIEW LABELS ON THE BACK AND IN THE DARK

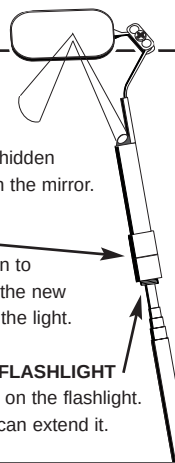

Bounce the LED off the mirror onto the hidden part number to view the number right on the mirror.

BATTERY REPLACEMENT

Unscrew top section from bottom section to expose the (3) L736 batteries. Replace the new batteries with the + side facing towards the light.

TURNING ON AND EXTENDING THE FLASHLIGHT

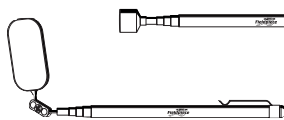

Twist the handle about two turns to turn on the flashlight. This will also unlock the handle so you can extend it.
