

UP TO 15 SEER PERFORMANCE

Air Conditioning & Heating

SSX14 HIGH-EFFICIENCY AIR CONDITIONER

Thank goodness for Goodman.®

Air Conditioning & Heating

ENERGY EFFICIENCY

As the owner of a high-efficiency Goodman® brand SSX14 R-410A Air Conditioner, you have made one of the best purchasing decisions possible in the HVAC marketplace. At Goodman, we strive to build heating and air conditioning equipment that offers high performance, energy efficiency, durability, and an environment-complementing design – all at a price that will have you saying **“Thank goodness for Goodman.®”**

In particular, your Goodman brand SSX14 Air Conditioner will provide you with reliable cooling at money-saving energy efficiency levels as compared to lower SEER air conditioning units.

COMFORT. SAVINGS. PERFORMANCE.

ENJOY THE COMFORT

You can count on your Goodman brand SSX14 R-410A Air Conditioner to keep you cool on even the hottest summer days. The high-efficiency compressor operates in tandem with a high-efficiency coil, cooling your home effectively.

And if that’s not enough, Goodman goes one step farther: we install a liquid-line filter dryer in every air conditioner we build. The filter dryer prevents moisture and debris from entering the compressor motor and expansion device, thus helping to extend the life of the system. Many manufacturers leave this step out, but we install filter dryers in all of our air conditioners.

RATING YOUR COMFORT

When properly matched and installed, your Goodman brand SSX14 Air Conditioner delivers a performance up to 15 SEER. Air conditioners with higher SEER represent more energy-efficient operating levels compared to lower SEER units. In short, as the SEER increases so does the unit’s energy efficiency rating. In many applications, the efficiency of your air conditioner can be enhanced by using it in conjunction with a Goodman brand variable-speed gas furnace.

The use of Goodman’s SmartCoil 5mm tube condensing coil design optimizes the heat transfer ability of R-410A refrigerant compared to standard 3/8” copper tubing.

SMARTCOIL™ TECHNOLOGY SMALLER IS SMARTER

Long ago the HVAC industry determined that the combination of copper tubing and aluminum fins provided the most efficient transfer of thermal heat available. Today, the Goodman brand has improved upon this industry standard by making the condensing coil copper tubing smaller and smarter. The result is an air conditioning unit that can offer high efficiency, use less refrigerant, and deliver enhanced indoor comfort to you for years and years.

R-410A REFRIGERANT

Compared to lower SEER, R-22 refrigerant units, your new Goodman SSX14 Air Conditioner system will not only provide you with money-saving cooling performance for many years, but it also features R-410A refrigerant. This refrigerant does not contain chlorine.

Introduced in 1995, R-410A refrigerant has helped increase the durability and reliability of air conditioner compressors.

IMPRESSIVE FEATURES AND BENEFITS: GOODMAN® BRAND SSX14 R-410A HIGH-EFFICIENCY AIR CONDITIONER

- Chlorine-free R-410A refrigerant
- A high-performance, high-efficiency compressor
- A factory-installed in-line filter drier
- 5mm SmartCoil™ condenser coil in select models
- A louvered cabinet made of heavy-gauge galvanized steel that protects the coil, while its appliance-quality, post-paint finish resists the effects of weather and time
- High-quality compressor sound blanket
- A three-bladed fan and a louvered sound-control top – all of which add up to quieter system performance
- A high-efficiency condenser coil made of corrugated aluminum fins and rifled refrigeration-grade copper tubing
- An attractive design, finished in an Architectural Gray color that complements any home environment
- AHRI certified
- High- and low-pressure switches
