# FUEL Mizer™

Outdoor Reset Switching Relay

## Joins the controls family.

A boiler reset control and switching relay in one unit

### Now Taco has two choices for Outdoor Boiler Reset Controls.

You can combine a **Zone Control -EXP** with a **PC700** or you can use the new **FuelMizer™ (SR501-OR)** which has all the features needed for a cost effective package intended for the retrofit market. Both options feature Taco quality and reliability throughout.

Zone Control -EXP

PC700

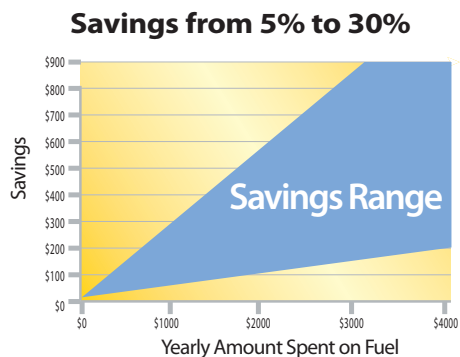

### Introducing the FuelMizer

The FuelMizer is a microprocessor-based control designed to regulate the supply water temperature of a single boiler, based on the outdoor temperature. The FuelMizer is a boiler reset control and switching relay in one unit. The FuelMizer is ideal for retrofit application, but may also be used in new installations as well.

The FuelMizer includes functions such as a simple to set reset ratio adjustment, warm weather shut down (WWSD), minimum boiler temperature setting, and boiler differential setting. The control also includes both outdoor and boiler sensors.
