UP 10-16BN5 ATLC (Part# 96433899)
Built-in timer, line-cord, and aquastat

Hot Water Recirculation

– The traditional HWR solution

Grundfos innovation offers the only traditional recirculation solution that provides all the answers in one package. Utilizing the UP10-16 makes your hot water recirculation needs a snap. You install the dedicated return line, and the circulator does the rest!

Features

- Quick and easy installation
- Whisper quiet operation
- Built-in timer, line-cord and adjustable aquastat
- Unique wet rotor design
- Aquastat control ensures optimum operation
- Includes check valve to eliminate back flow
- Integral isolation valve for ease of installation
- Saves up to 12,000 gallons of water per year

– How Traditional Hot Water Recirculation Works

THE GRUNDFOS UP10-16BU ATLC

1 pipes: Traditional HWR systems require a dedicated return-line to be installed from the end of the hot water supply back to the water heater.

2 pump: A pump is used to circulate water through the main hot water line and back to the water heater.

A timer, aquastat, or both may be used to control the operation of the pump. The Grundfos UP10-16BU ATLC has all of these components built-in the pump.

Pump Technical Data:

- Flow Range:** 0 to 3.5 U.S. GPM
- Head Range:** 1 to 5 U.S. Feet
- Motor:** 25W, Single Phase, 115V
- Min. Fluid Temperature:** 36°F (2°C)
- Max. Fluid Temperature:** 203°F (95°C)
- Max. Working Pressure:** 145 PSI
- Standard Features:** 5ft. line-cord w/plug
- Optional Features:** Timer, Aquastat

Performance Curve:

Models	Material Number	1/2" Sweat	1/2" F NPT	1 1/4" Union	Line Cord	Timer	Aquastat	Check Valve	Isolation Valve
