...And We're *Just* Getting Started!

THE ONE SOURCE

Established in 1909, Bacharach, Inc. is the world leader in the design, manufacture, and service of advanced equipment to measure and detect gases including instruments that detect, measure and record combustion, refrigerant and environmental gases, temperature, humidity and other air quality and safety parameters.

- The ONE Source serving the HVAC/R industry for:
 - Combustion analyzers
 - Leak detectors (combustible & refrigerant gases)
 - Fixed gas monitors
 - A/C and refrigerant recovery machines, maintenance tools and gauges
 - Safety and specialty products
- Products designed to aid in the installation and servicing of heating, air conditioning & refrigeration equipment
- Instruments designed for residential, commercial and industrial applications
- In-house product development and technical expertise
- Excellent customer support — training, customer service, repairs
- Made in the U.S.A. for over 100 years 

LOOK FOR THESE SYMBOLS

The capabilities needed for test and measurement instrumentation vary widely depending on the application and environment. To simplify your selection process, we have placed a symbol (,  and ) designating the most appropriate application use for the product;

-  — **Residential:** Homes, and apartments (furnaces, boilers, hot water heaters, air conditioners, and stoves)
-  — **Commercial:** Institutions, office buildings, food storage, and labs (boilers, chillers, refrigeration racks, and indoor air quality)
-  — **Industrial:** Manufacturing facilities, and utilities (health and safety monitoring, control processes, and emissions)

BACHARACH'S FYRITE® FAMILY OF COMBUSTION ANALYZERS

For the most comprehensive full featured family of combustion analyzers, check out the Fyrite® combustion analyzer products. From simple to sophisticated and from basic to multi-use, Fyrite® products set the performance standard in their class. These instruments provide unique features that will meet the needs of contractors whatever the application.

B-SMART® SENSORS FOR THE FYRITE® INSIGHT® AND PCA®3

B-Smart® Sensors are the newest addition to the Fyrite® Family, providing the customer some major advantages when using the Fyrite® INSIGHT® and PCA®3. This technology allows the user to replace pre-calibrated sensors in the field, thus eliminating the need to send it in for calibration.

The B-Smart® Sensor itself is only part of the equation, select the B-Smart® Calibration program that is right for you... then let us worry about the details. Bacharach will automatically send you the calibrated sensors.

Sign up today, go to www.MyBacharach.com/bsmart

THE B-SMART® ADVANTAGE

Features	+	Advantages	=	Benefits
B-Smart® factory-calibrated sensors sent right to your door		No need to return your instrument for calibration		No downtime
Plug and play sensors		Install the sensors yourself		Save time
Self calibration		No field gas calibration		Save money

Combustion Analyzers

ECA 450

Unlike any other industrial grade combustion efficiency and environmental analyzer on the market today, the ECA 450 conducts accurate combustion and emissions tests to ensure that industrial equipment is burning efficiently and environmental regulations are being met.

- Industrial grade analyzer for both combustion efficiency and emissions analysis
- Generates and prints combustion efficiency and emissions reports
- Supports modular, field replaceable, sensors for O₂, NO, NO₂, SO₂, CO and HC
- Expandable in field - add or change sensors as your requirements change
- Ideal for sampling and monitoring furnaces, boilers and other industrial combustion equipment
- Comes standard in hard case, 12" sample probe assembly with 15' of hose and built-in printer

MEASUREMENT	RANGE
Primary/Ambient Air Temperature	-4° to 999° F (-20 to 537 °C)
Stack Temperature	-4° to 2400° F (-20 to 1316 °C)
Draft / Differential	-27.7 to +27.7 in. of H ₂ O
Oxygen (O ₂)	0.0 to 20.9%
Carbon Monoxide (CO) (H ₂ comp)	0 to 4,000 ppm
Carbon Monoxide (CO) (High Range)*	4,001 to 80,000 ppm
Nitric Oxide (NO)*	0 to 3,500 ppm
Nitrogen Dioxide (NO ₂)*	0 to 500 ppm
Sulfur Dioxide (SO ₂)*	0 to 4,000 ppm
Combustible Gases (HC)*	0 to 5.00% (application dependent)

SELECTABLE FUELS

Natural Gas, Propane, Coal, Wood, Kerosene, Oil #2, Oil #4, Oil #5, Oil #6, Bagasse

CALCULATED RANGES	RANGE
Combustion Efficiency	0.1 to 100.0%
Excess Air	0 to 250%
Carbon Dioxide (dry basis)	0 to fuel dependent maximum
NO _x (NO _x = NO + NO ₂)	0 to 4,000 ppm
NO _x referenced to % O ₂	0 to 17,000 ppm
CO referenced to % O ₂	0 to 99,999 ppm
NO referenced to % O ₂	0 to 14,900 ppm
NO ₂ referenced to % O ₂	0 to 2,100 ppm
SO ₂ referenced to % O ₂	0 to 17,000 ppm

* Optional

Two pumps are included. The first pump supplies gas sample to the sensors. The second pump supplies fresh air to purge the low range CO sensor when CO levels exceed 4000 ppm. Probe includes a standard probe and hose assembly equipped with a water trap, particulate filter, probe stop, 15 feet of hose and 12-inch probe tube.

OTHER SPECIFICATIONS

Power	Universal AC adapter and an internal battery pack. Adapter will accept input voltages from 100 to 240V. Fully charged battery pack provides a minimum of 8 hrs of operation
Size	13.5" H x 18.5" W x 9" D (34.3 cm x 47 cm x 22.9 cm)
Weight	25 lbs (11.34 kg)
Memory	Stores over 1000 test records
Display	160 x 160 (2.5 in. x 2.5 in.) Graphic Liquid Crystal Display
Warranty	1 year (does not include probe)

C i PCA[®] 3

Bacharach's all new PCA[®] 3 is the definitive combustion and emissions analyzer that enables fast and accurate measurement for on-demand or semi-continuous sampling of light industrial, institutional, commercial and residential furnaces, boilers and appliances. The PCA[®] 3 uses unique B-Smart[®] sensor technology to save downtime and calibration costs.

- Uses up to 6 electrochemical sensors – field-upgradable
- Large full color graphic display with bright backlighting, zoom display and dimming mode
- Measures O₂, stack temperature, primary/ambient temperature and pressure/draft
- Measures CO (hydrogen compensated) from 0–4,000 ppm
- Provides both CO measurement capability (for safety) and calculation of combustion efficiency
- Selectable fuels include natural gas, kerosene, propane, coal, #2, #4 and #6 fuel oil, wood, bagasse and digester gas
- Includes hard carrying case, rubber boot, 12" probe assembly, spare filters, 4 "AA" batteries, "smart" sensors (as ordered), USB cable and PC software

PCA[®] 3 with Reporting Package Kits

Combine the PCA[®] 3 with the IrDA printer and you have the perfect Reporting Package tool. All reporting package kits contain all items included with the instrument, plus the IrDA printer, USB cable and software.

Combustion Analyzers

NEW

Fyrite® INSIGHT®

The Fyrite® INSIGHT® is the newest Bacharach Combustion Analyzer that redefines what a combustion analyzer should be. This lightweight, hand-held analyzer is five tools in one. An INSIGHT® will:

- Perform combustion efficiency testing for 8 different fuels
- Test CO ambient conditions
- Measure CO in flue and calculate CO air free
- Serve as a dual channel digital thermometer (Up to 999°F)
- Function as a digital manometer (draft, gas pressure, ESP, up to 100 INWC)

INSIGHT® employs Bacharach's new B-Smart® CO Sensor technology that eliminates the need to send in the instrument for calibration, saving the user time and most importantly: money.

Other major features include user diagnostics, LCD and PC-based software for information and communication needs.

- Five Tools in ONE!
- Self calibration and easy access to sensors
- User diagnostics
- O₂ sensor life indication
- Calibration reminders
- Graphic LCD display
- Customize with your company logo
- Includes hard carrying case, rubber boot, probe, spare filter, 4 "AA" batteries and instructional DVD

Fyrite® INSIGHT® Reporting Package Kit

The INSIGHT® Reporting Package Kits contains all items included with the instrument, plus the IrDA printer, USB cable and software. It's a perfect tool for contractors.

B-Smart® Carbon Monoxide (CO) Sensors are the newest addition to the Fyrite® Family, providing the customer some major advantages when using the Fyrite® INSIGHT®. This technology allows the user to replace pre-calibrated sensors in the field, thus eliminating the need to send it in for calibration.

The B-Smart® Sensor itself is only part of the equation, select the B-Smart® Calibration program that is right for you... then let us worry about the details. Bacharach will automatically send you the calibrated sensor. For more information go to www.MyBacharach.com/bsmart.

Fyrite® Tech

Based on the same technology as the Fyrite® commercial units, the Fyrite® Tech is an affordable residential combustion analyzer that reduces service call time by providing accurate, electronic test results instantly. The Fyrite® Tech analyzers are easy to use: simply turn the unit on, select the fuel type (natural gas, oil, propane and kerosene), and insert the probe. It's that easy.

- Quick payback - The Fyrite® Tech reduces service call time by providing accurate, electronic test results instantly.
- Accurate operation - Tactile feedback from the instrument's keypad assures that the appropriate key has been pressed.
- Ergonomically designed - The instrument is lightweight and fits in the palm of your hand, making it easy to handle.
- Long battery life - Four alkaline batteries typically offer up to 18 hours of continuous operation with an automatic "power off" feature that saves energy.
- Low battery symbol indicator
- Purchase protection - Our two-year warranty on each analyzer and its sensors ensures worry-free operation.
- Measures O₂ (0-20.9%) and CO (0-2,000 ppm), stack temperature (0 to 999°F) and ambient temperature (32 to 212°F)
- Calculates combustion efficiency, excess air, CO₂ and CO air free

Fyrite® Tech 60

- Includes soft carrying case, 4 AA batteries, probe and instruction manual

Fyrite® Tech 60 Kit

- Includes hard carrying case, rubber boot, 4 AA batteries, probe and instruction manual - with or without IrDA printer

Fyrite® Starter Tech Kit

Combustion Analyzers

Fyrite® Classic

The Fyrite® Classic series includes fast, easy to use instruments for measuring carbon dioxide or oxygen. The units, while looking very similar, differ in construction and absorbing fluid. Each model is suitable for only the particular gas and measurement range for which it was manufactured. Accuracy of all Fyrite® Classic products is $\pm 0.5\%$.

KEY FYRITE® CLASSIC FEATURES INCLUDE:

- Broad measurement range
- Capable of being exposed to ambient temperatures from -30 to +150°F
- Withstands measurement gas temperatures up to 850°F

MEASUREMENT CAPABILITIES			
PART NUMBER	CO ₂	O ₂	APPLICATIONS
0010-5000	0-20%	NA	Flue gas combustion tests and CO ₂ tests of heat treating atmospheres
0010-5001*			
0010-5020	0-20%	0-21%	All of the applications above plus; oxygen deficiency testing, O ₂ concentrations in hydrogen cooled generators and oil sealed inert gas transformers

0010-5053	0-7.6%	NA	CO ₂ tests of controlled atmospheres in fruit, vegetable, meat storage rooms, and incubator monitoring
0010-5083*			
0010-5054	NA	0-7.6%	Oxygen determination in flammable gases; oxygen tests to check inertness of atmosphere in silos, fuel tanks, etc.
0010-5011			
0010-5012*	NA	0-21%	Flue gas combustion tests, oxygen deficiency test. Checking oxygen concentrations in hydrogen cooled generators and oil sealed inert gas transformers
0010-5032	0-60%	NA	Checking CO ₂ in inert gas blankets in tankers and barges carrying gasoline and other combustibles;
0010-5033*			CO ₂ tests on lime kilns, checking CO ₂ in sewage plant digesters

Fyrite® Classic Oil Kit

0010-5022	20%	NA	Includes: CO ₂ indicator, True Spot Smoke Tester, Oil Burner Smoke Scale, Fire Efficiency Finder, Tempoint Dial Thermometer, MZF Draft Gauge and hard carrying case
0010-5150*			

* Export Kit (shipped without fluid)

OPTIONAL ACCESSORIES

0010-5057	Refill fluid CO ₂ (20% & 60%) – 3 bottles
0010-5100	Refill fluid CO ₂ (7%) – 3 bottles
0010-5060	Refill fluid O ₂ (21% & 60%) – 3 bottles
0010-5103	Refill fluid O ₂ (7%) – 3 bottles

Combustion Tools

True Spot® Smoke Test Kit

- Evaluates smoke density in the flue gases from distillate fuel
- Accurate smoke readings take less than a minute
- Standard in the industry

0021-7006	True Spot® Smoke Test Kit
0021-7012	True Spot® Test Pump
0021-0018	True Spot® Smoke Scale
0021-0040	True Spot® Lubricant

0021-7018	12 in., 200°F to 1000°F

Drafrite® Pocket Gauge

- This pocket size draft instrument is suitable for checking flue pipe, chimneys, smoke hoods and oil burner firing rates

0013-3000	Drafrite® +0.10 to 0 to -0.14" WC
0013-3001	Drafrite® +0.05 to 0 to -0.25" WC
0013-5010	Drafrite® Tube Set

Note: All models supplied with two sections of draft tube and Leatherette Case 0013-0003.

MZF Draft Gauge

- Requires no liquids or leveling
- Ideal for use in applications such as residential, commercial and industrial heating plants and for furnace draft pressure drop across filters

0013-7018	MZF Draft +1.0 to 0 to -5 mm WC
0013-7019	MZF Draft +0.05 to 0 to -0.25" WC
0013-7021	MZF Draft +0.05 to 0 to -1.0" WC

Note: All models supplied with 5" draft tube and 9' of rubber tubing.

Portable Manometer

A valuable instrument for measuring and adjusting the inlet and manifold pressure for gas heating equipment and appliances.

- The Bacharach Manometer is designed for accuracy, readability, and portability
- Also used to determine filter resistance, fan efficiency, air velocity, and static pressures

0017-7000	Portable Manometer 0-15 INWC and 0-8.5 oz. per sq. in.
0017-7002	Portable Manometer 0-15 INWC and 0-38 cm WC

BACHARACH'S LEAK DETECTOR FAMILY OF PRODUCTS

Bacharach manufactures a complete line of leak detectors for combustible and refrigerant gases and one universal leak detector, the Informant® 2, that measures both types. Bacharach handheld portable units offer a wide range of visual and audible indicators, fast warm up and long battery life. Models are also available that are certified intrinsically safe for use in Class I, Division 1 Groups A,B, C and D hazardous locations. Designed for sensitivity and fast response, there is a Bacharach unit available to meet most any leak detection requirement.

Leak Detectors

Informant® 2

The Informant® 2 is the only universal leak detector that can detect both combustible and refrigerant gases and is perfect for residential and commercial heating and cooling contractors.

The Bacharach Advantage:

- One-of-a-kind dual purpose refrigerant and combustible gas leak detector
- Automatically leads you directly to leak source
- Can swap sensor tips within seconds
- Sensitivity levels are automatically adjusted
- Refrigerant sensor tip is finely tapered to gain access to hard to reach areas

Informant® 2 Contractor Kit

- Instrument comes with refrigerant and combustible gas sensors, color-coded probe tips, instruction manual, protective rubber boot, 4"AA" batteries, 5 filters and hard carrying case

Informant® 2 Deluxe Kits

- Refrigerant and combustible leak detector
- Includes refrigerant and combustion sensors, color-coded probe tips, protective rubber boot, flashlight, 6"AA" batteries, 5 filters and hard carrying case

SENSING TECHNOLOGY

Refrigerant Sensor	Heated Diode - U.S. Patent No. 5,932,176
Combustible Sensor	Patented semiconductor type. Five year typical life. Plug-in replacement

GASES DETECTED

Refrigerants	All CFC, HCFC and HFC refrigerants including: R-12, R-22, R-123, R-134a and blends R-404A, R-408A, R-409A and R-410A (i.e., any refrigerant containing Chlorine, Fluorine or Bromine gas)
Combustible Gases	All combustible gases and vapors 0 to 400%

RESPONSE TIME

Refrigerants and Combustible Gases	Instantaneous
------------------------------------	---------------

ALARM SENSITIVITY

Refrigerants	Less than 0.25 oz/yr of R-134a (hardest to detect refrigerant)
Combustible Gases	Minimum 50ppm (Methane)

ALARM TYPES

Audible, dual visual LED's and flashing probe tip

OTHER SPECIFICATIONS

Power	Four disposable AA alkaline batteries (included)
Battery Life	4-5 hours, under typical intermittent operation
Size	1.75"W x 9.6"L x 2.25"H (4.45 cm x 24.4 cm x 5.7 cm)
Weight	0.86 lbs. (0.39 kg) with batteries
Warranty	One year, including sensors

CERTIFICATIONS

Refrigerants	SAE J1627; CE Mark
Combustible Gases	UL 913, intrinsically safe for use in Class 1, Division 1, Group D hazardous areas; CE Mark

- Dual level sensitivity settings (20 and 50 ppm)
- UL 913 Intrinsically Safe for Class I, Division 1, Groups A, B, C and D hazardous locations; CE-Mark

Tru Pointe®

0019-8106

- Refrigerant gas leak detector at an affordable price for the budget conscious customer
- Instantly responsive to all refrigerants
- Includes hard carrying case and batteries
- Audible and visual alarms
- 10 second warm up
- SAE J1627; CE-Mark

Leak Detectors

Tru Pointe® Ultra & Tru Pointe® Ultra HD

Bacharach's Tru Pointe® Ultra is a compact ultrasonic leak detector that uses patented technology to detect leaks in air conditioning and refrigeration systems. The Tru Pointe® Ultra is the world's first pocket-size electronic instrument that can simultaneously detect the vacuum and high pressure leaks that occur in HVAC/R systems. The Tru Pointe® Ultra guides the user to a leak by quantifying the intensity of the ultrasound and converting it to a sound the user can hear easily through headphones.

The Bacharach Advantage:

- Not affected by wind or the presence of other gases or high concentrations
- Ten-step LED bar graph shows signal strength
- On-the-fly sensitivity adjustment aids in locating leaks quickly
- True sound reproduction ensures fast recognition of leaks
- Finds small leaks instantly

Headset Options - Choice of compact, foldable headset or high-quality stereo headset; choose Tru Pointe® Ultra or Tru Pointe® Ultra HD.

SoundBlaster® - Ultrasonic Sound Generator. Artificially pressurizes rooms, tanks, enclosures with sound that the Tru Pointe® Ultra can detect thus locating where they leak air, water or other fluids or gases.

Touch Probe - Helps convert sounds within valves or solids to airborne sound for the Tru Pointe® Ultra to detect. (Patented).

R C Tru Pointe® 1100 Ultrasonic Leak Detector Kit

The Tru Pointe® 1100 is a state-of-the-art digital ultrasonic inspection system for leak detection, mechanical inspection and troubleshooting. It accurately detects ultrasounds generated by leaks and pinpoints them at the speed of sound. It detects airborne leaks or electrical arcing in the frequency band of 34 kHz to 42 kHz and 16 kHz to 24 kHz for internal leaks or bearing wear using the patented internal Touch Probe sensor.

- Unaffected by the presence of other gases or sounds in the test area
- Includes high-quality noise attenuating headphones compatible with hard hats
- Unique AudioZoom™ volume control

Tru Pointe® 2100 Ultrasonic Leak Detector Kit

The first of its kind, the Tru Pointe® 2100 uses two software-controlled sensors for the detection of airborne leak sounds and for the detection and location of solid-borne sounds from leaks and bearing wear. For ease of use and interpretation, the Tru Pointe® 2100 has two digital LED displays – a 20-segment bargraph display with peak-hold and an alphanumeric display for instrument settings and precision measurements. It's the most accurate and repeatable ultrasonic inspection instrument in its class.

- Capable of detecting a 5 PSI leak out of a 0.005" hole, 30' to 40' away (depending on background noise)
- Ideal for stream trap testing, detecting bearing wear, gas and valve leaks
- Capability of detecting ANY gas leaks, regardless of chemical property or concentration
- Capability of functioning like a stethoscope, using an industry-exclusive acoustic band, 0-10kHz

H25-IR

The H25-IR is an industrial-grade leak detection and measurement system. This instrument will locate, pinpoint and quantify the leak. Once a leak has been located it can be measured and the measured values can be logged and totaled for the entire system. This capability allows the user to ensure environmental or quality assurance compliance. This product can measure most refrigerant gases (over 40 in current library) as well as R-600a and SF₆, which can be displayed in terms of leak rate (oz/yr, g/yr, mL/s, PaM3/s) or concentration (ppm). The long-life infrared sensor and high sensitivity make the H25-IR the smart choice for the most demanding leak detection and measurement applications.

Faster response time

- Infrared (IR) detection technology ensures long sensor life and high accuracy
- IR sensor is tuned specifically to target gas minimizes false alarms
- Internal leak source enables calibrations to be made quickly and easily
- Detects leaks as small as 0.03 oz/yr

A/C, REFRIGERATION AND MAINTENANCE FAMILY OF PRODUCTS

Bacharach offers a complete line of rugged and durable refrigerant recovery machines designed for portability. These units simplify and speed up the recovery of most common refrigerants and are available to meet the requirements of residential, commercial and industrial work environments. In addition, Bacharach offers an A/C refrigeration and maintenance group of products to do the job, including vacuum pumps, scales, manifolds, and swaging and cutting kits.

A/C, Refrigeration & Maintenance

Stinger®

The Stinger® is one of the highest quality refrigerant recovery units on the market. Its powerful compressor will pump refrigerants at a quick pace while preventing pollutants from escaping into the environment. This A/C refrigerant recovery unit has been designed with R410A in mind in addition to other refrigerants, and is perfect for residential and light commercial contractors.

The Bacharach Advantage:

- Vacuum shut off allowing for unattended recovery operation
-  Easy to read low vacuum/tank full LED
-  Carrying strap
-  Improved packaging protects knobs and gauges
-  Larger compressor provides better heat dissipation on hot days, IMPORTANT for R-410A
- High torque motor on compressor handles higher pressures under load
- One year over the counter warranty
- Handles almost all refrigerants
- Labeling on rear of unit with directions for proper connection
- Lightweight and compact

MODEL 3600 / MODEL 3700

For commercial refrigerant recovery applications, the rugged Model 3600 and Model 3700 are high performance machines with twice the capacity and faster recovery than competitive units. With 0.5 hp (Model 3600) or 1.0 hp (Model 3700) oil-less proprietary high performance compressors, these workhorses recover vapors and liquids at unsurpassed ARI performance certified rates.

- Recovers ALL commonly used, refrigerants including R-410A (Puron™)
- 550 PSI high pressure cut-off, high pressure gauges
- LED system status display
- Rugged and reliable
- Automatic shut-off when evacuation is complete
- Self purge and vacuum shut-off
- Hi-low compressor head and valves
- Simple operation / purges clean
- Contains integrated sight glass
- 3/8" ports for faster, high-volume refrigerant recovery

R-22id

The R•22id is a compact handheld refrigerant identifier that verifies the presence and quality of R22 refrigerant in HVAC/R air conditioning systems and tanks. It delivers fast and accurate refrigerant identification to avoid potential damage to your air conditioning service equipment and business from refrigerant contamination. With a simple, one button operation, system contents can be identified and verified in less than five minutes with automatic step-by-step indication of the gas sampling process.

The Bacharach Advantage:

- Compact and lightweight design
- Simple one-button operation
- Step-by-step user indication of gas sampling process
- Quick PASS or FAIL result

R C Pur•Chek™

Pur•Chek™ is smarter and faster than any refrigerant identifier used in the industry today. Its compact size and ergonomic design makes testing easy and it utilizes non-dispersive infrared (NDIR) technology to determine the weight concentrations of R12, R134A, R22, hydrocarbons, and air. It also features 'Blend-Chek' analytical software which quickly and accurately indicates the presence of R410A blend refrigerant.

- Accurately determines refrigerant purity
- Fast 60-second test time
- Large display clearly shows results
- Optional built-in printer

Pur•Chek Pro™

The all new Pur•Chek™ Pro is the ultimate HVAC/R diagnostic refrigerant analyzer that enables fast and accurate testing of the widest range of refrigerants ever offered in a portable instrument. Pur•Chek™ Pro identifies more than a dozen HVAC/R refrigerants and provides a complete component breakdown of refrigerant blend ratios that can be printed out with the built-in printer.

- Oil contamination resistant
- Composition breakdown of more than a dozen refrigerants
- Internal thermal printer provides on-the-spot documentation
- Remote software updates for new refrigerants

BACHARACH'S GAS LEAK MONITOR FAMILY OF PRODUCTS

Bacharach refrigerant monitors provide a unique combination of high sensitivity, large dynamic measurement range and speed of response. Utilizing infrared technology, these single and multi-zone products allow customers point by point customization, remote communications, centralized reporting and maintenance. Mainly used to detect and monitor Halogen, Ammonia and Carbon Dioxide refrigerant gases found in mechanical rooms, grocery stores and manufacturing. These state-of-the-art products lead the industry in performance, cost of ownership, integration capabilities and cost. Bacharach's gas leak monitor family of products are compliant with ASHRAE standard 15-2007, ETL Energy Saving Listed and meets California Code Regulations for Refrigerant Monitors. Low level accuracy and detection limits respond to leaks when they are small, providing early warning for detection and repair; resulting in lower energy consumption as well as reduced refrigerant costs.

Fixed Gas Monitors

Single-Zone Gas Leak Monitor (HGM-SZ / AGM-SZ)

The HGM-SZ (Halogen Gas Monitor Single-Zone) is designed for continuous single-point monitoring of Ammonia, CFC, HFC, HCFC and Halon refrigerant gases. The HGM-SZ displays the type of gas being monitored, along with displaying both the current gas level and the peak gas level detected on its front panel LCD. The instrument retains a log of previous readings that can be easily accessed for analysis.

An internal audible alarm and front panel indicators are provided to signal alarm and fault conditions, and relay contacts can be used to trigger external alarm devices in the event of a system fault, or if a leak (small), spill (medium), or evacuation (large) level of gas is detected. The system also includes a 4-20 mA current loop interface that can be connected to remote monitoring equipment. Bacharach's gas leak monitor family of products are compliant with ASHRAE standards, 15-9994 and 15-2004, and meets California Code Regulations for Refrigerant Monitors.

- No costly calibrations required
- Single-zone gas leak refrigerant monitor
- Measurement range of 0-10,000 ppm
- Sensitivity to 1 ppm
- Provides continuous, unattended monitoring
- Capable of detecting and measuring any CFC, HFC or HCFC
- Can monitor a location up to 500 feet from display unit
- Other models are available that detect and monitor gases such as low range and high range CO₂, and Nitrous Oxide (N₂O)

ORDERING INFORMATION

Multi-Zone Gas Leak Monitor (HGM-MZ / AGM-MZ / CO₂-MZ)

The Multi-Zone Gas Leak Monitor is a multiple area monitoring system for low level continuous monitoring of refrigerant gases used in most commercial systems including; CFC, HCFC, HFC, Ammonia and Carbon Dioxide. This state-of-the-art product leads the industry in performance, cost of ownership, integration capabilities and cost. Capable of detecting more than 35 refrigerant gases, the system design supports compliance to gas monitoring requirements of ANSI/BSR ASHRAE 15-1994 and 15-2004, ETL Energy Saving Listed and meets California Code Regulations for Refrigerant Monitors.

Bacharach's HGM-MZ uses stable infrared detection technology, and therefore requires only minor periodic maintenance such as the occasional replacement of filters. The monitor incorporates active diagnostics that continuously check the system for proper operation. An audible alarm and front panel indicators are provided to signal alarm and fault conditions, and relay contacts are provided that can be used to trigger external alarm devices in the event of a system fault or preset gas level thresholds.

BACHARACH'S SAFETY & SPECIALTY FAMILY OF PRODUCTS

Bacharach's broad experience and exceptional capabilities in the design and manufacture of gas monitors and analyzers over the years has led to the development of many special purpose products. These products often serve as tools in safety systems as well as various areas of performance test and measurement. Following are a few examples of specialty Bacharach products. The instruments included in this section are designed for the measurement of carbon monoxide, carbon dioxide and sulfur hexafluoride. These units serve unique purposes with a heavy emphasis on safety. Feel free to contact Bacharach if your monitoring need is out of the ordinary.

- Residential appliances, home inspection (CO)
- Food processing, pipe leak testing, flue gas (O₂)
- Safety and indoor air quality (CO₂)
- Incubators, medical gases (CO₂)
- Horticulture, food processing (CO₂)
- Air velocity and temperature meters

Snifit®

Bacharach's affordable Snifit monitors accurately measure carbon monoxide levels in a variety of applications. Small and lightweight, yet durable for service technicians, the Snifit quickly and precisely measures CO levels from 0-1,999 ppm. With simple-button operation the monitors are easy to use and maintain.

- 0019-7060
- Ideal for ambient air safety checks on residential appliances, home inspection and HVAC Service
 - Measures and displays Carbon Monoxide 0-1,999 ppm, 1 ppm resolution
 - Small enough to fit in your pocket
 - Backlight for low light conditions
 - Three button operation
 - Low battery indicator

Monoxor® III / Oxor® III

Single gas monitors for Carbon Monoxide or Oxygen. Ideal for indoor air quality or food processing. These hand-held battery-operated monitors are versatile and easy to use. Each unit comes with a stainless steel probe assembly for remote sensing.

- Easy and affordable
- Full 4 digit display
- 18 hour battery life
- Low battery symbol indicator

Monoxor® III:

- Measures CO levels between 0 and 2,000 ppm in ambient air and stack gasses
- Includes 4 AA batteries, probe and hose assembly, carrying strap, instruction manual and hard carrying case
- Monoxor® III Kit includes 8 AA batteries, probe and hose assembly, carrying strap, instruction manual, hard carrying case and IrDA printer

Oxor® III:

- Measures and displays O₂ levels between 0 and 20.9%
- Includes 4 AA batteries, probe, hose assembly and hard carrying case
- Oxor® III Kit includes 8 AA batteries, probe and hose assembly, carrying strap, instruction manual, hard carrying case and IrDA printer

IEQ Chek™ Indoor Environmental Quality Monitor

IEQ Chek™ is a versatile multi-sensor instrument for measuring, monitoring and recording indoor environments for air quality diagnosis. With its 7-sensor capacity, the new IEQ Chek™ measures temperature, relative humidity, and up to 5 additional plug-and-play 'smart' sensors, including carbon dioxide (CO₂), carbon monoxide (CO), oxygen (O₂), formaldehyde (HCHO), total volatile organic compounds (TVOCs), nitrogen dioxide (NO₂), sulfur dioxide (SO₂), ammonia (NH₃), hydrogen sulfide (H₂S) and combustible gases. Large multi-line backlit LCD display with simultaneous viewing of all installed sensors, battery life, pump indicator and calibration status.

- Versatile handheld instrument with flexible 7-sensor capacity
- Ideal for indoor environmental quality measurements
- On-board sensors for temperature and relative humidity; add up to 5 additional plug-and-play 'smart' sensors - available with on-board pump for sampling air
- Stores over one million data points with SD flash card

Comfort Chek™ 500 Portable Air Quality Monitor

Comfort Chek™ 500 is an affordable, easy to use indoor air quality (IAQ) monitor designed with three sensors that simultaneously measure and record temperature, relative humidity, and carbon dioxide (CO₂) levels in the air. It can collect up to 26,000 data points and store them in its internal flash memory. The large, backlit LCD displays all three sensor readings as well as battery status and provides easy readability in dark environments. Powered by alkaline batteries or with supplied wall adapter.

- Automatically calculates and displays MIN, MAX, STEL and TWA values for CO₂
- Quick and easy calibration for CO₂ and RH
- Offers around the clock air quality monitoring in office environments or public facilities

Portable Area Gas Monitor

Bacharach's Portable Area Gas Monitor is an advanced instrument using non-dispersive infrared (IR) technology which provides superior stability and repeatability. The unit can provide readings in either parts per million (ppm) or elapsed time weighted average (TWA) with a resolution down to 1 ppm. The internal pump and self-contained purge-air bag provides a constant zero enabling the monitor to be used in contaminated environments without affecting the readings of the target gas. Additional features include datalogging of up to 200 readings, and a leak check mode with audible and visual alarms.

- This area gas monitor utilizes infrared technology for detection and measurement of gases including SF₆, N₂O, and refrigerants
- Seeks out low-level leaks with display and alarm
- Download and print capabilities
- Applications include refrigerant gas detection, safe entry, and medical monitoring
- Two year warranty
- Instrument comes with battery pack, charger and soft case
